RATE AND REWRITE

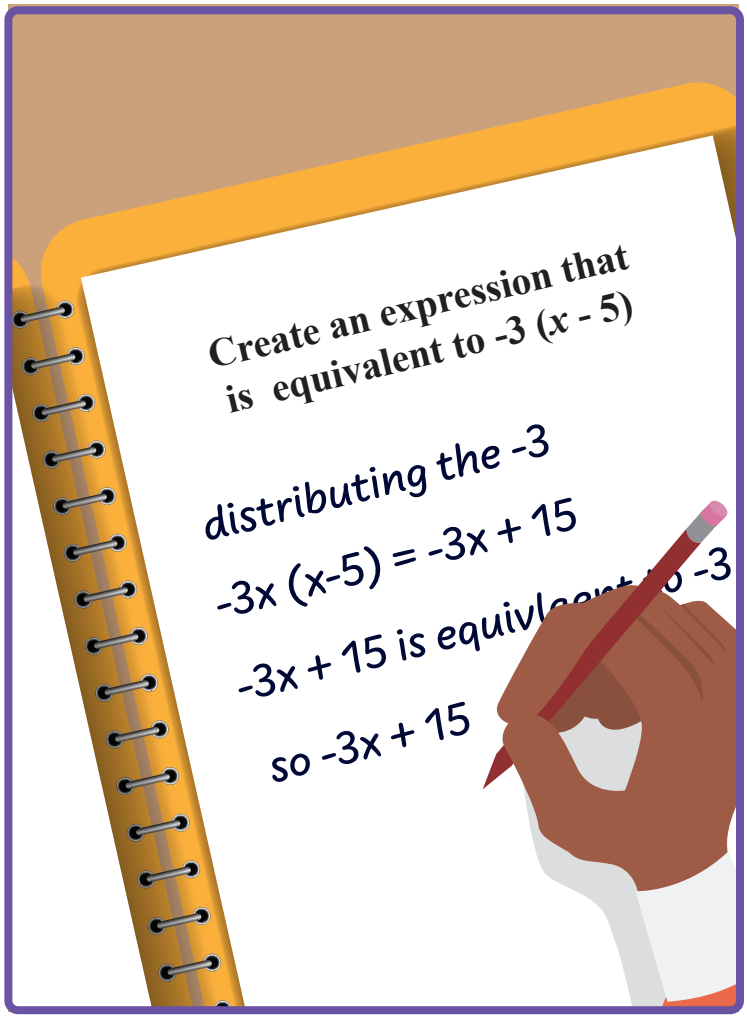

TRY IT

Provide an incorrect, incomplete, or unclear worked example and have students rate it from 1–5 stars, then have them rewrite it to correct or clarify the solution.

WHY TRY IT?

- Engages students in error analysis and revision
- Builds competence with the problem-solving process
- Promotes precision and clarity in communication

TEACHER NOTES

This strategy can be used during classwork or homework. When choosing examples, prioritize common student errors or unclear reasoning that students are likely to encounter. Encourage students to revise and improve the existing strategy rather than replacing it entirely.

CAUTION Do not use actual students' work for Rate and Rewrite to avoid student embarrassment or anxiety.
